## Validation Process

I used the W3C Markup Validation Service (<https://validator.w3.org/>) to validate all HTML5 pages. Below are the detailed results for each page.

### Page 1 : homapage

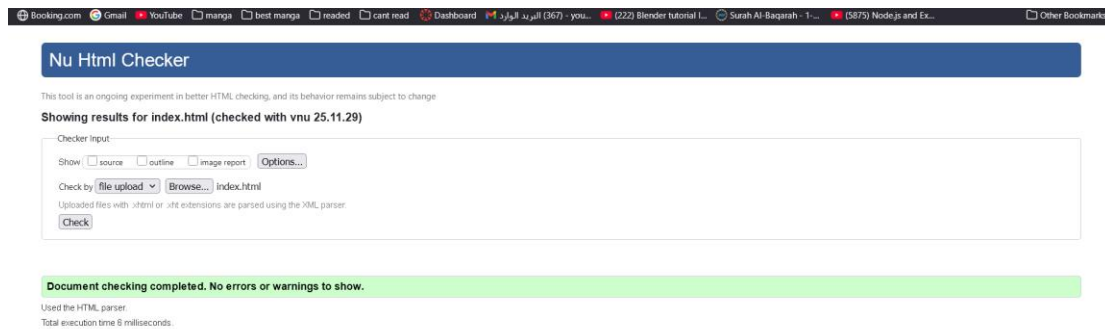

File name: index.html

Status : Valid HTML5

Errors : 0

Warnings : 0

Validation Evidence:

The screenshot shows the Nu Html Checker interface. At the top, it says "Nu Html Checker". Below that, a note states: "This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change". The main heading is "Showing results for index.html (checked with vnu 25.11.29)". Under "Checker Input", there are checkboxes for "source", "outline", and "image report", along with an "Options..." button. The "Check by" dropdown is set to "file upload" and "Browse..." is next to "index.html". A note below says "Uploaded files with .html or .xht extensions are parsed using the XML parser". A "Check" button is at the bottom. A green bar at the bottom of the results area says "Document checking completed. No errors or warnings to show." Below this, it says "Used the HTML parser." and "Total execution time 6 milliseconds".

## Issue Resolution Log

**Issue:** border attribute on <table> element in student-dashboard.html.

**Resolution:** Removed the border attribute as it is obsolete in HTML5.

**Issue:** article elements lacking heading tags in student-dashboard.html.

**Resolution:** Added <h4> headings to all article elements to ensure proper semantic structure.

**Issue:** role="navigation" on <nav> element flagged as redundant.

**Resolution:** Kept the attribute as it is a specific requirement of the assignment instructions .
